

ADOPTION OF THE 2006 DALLAS FIRE CODE

The Adoption Process
Steps 1-8

Step 1

International Code Council

The family of International Codes are promulgated by the International Code Council.

Step 2

Recommended amendments from the North Central Texas of Government's Code Correlating Committee & Fire Advisory Board (COG) are reviewed for applicability to our jurisdiction.

Step 3

COG's recommended amendments are reviewed to determine if they are contradictory to any current Dallas codes or amendments. If any contradictions are found, the amendment is either rejected or accepted, taking into consideration the optimum fire safety protection for our Dallas citizens.

Step 4

Once it's determined that the proposed COG amendments meet our requirements and needs, we compare them to the current codes of the Dallas Building Code.

The Dallas Fire Code and the Dallas Building Code must be compatible in their application.

Step 5

The modified code is reviewed by the Fire Code Advisory and Appeals Board for approval, rejection or additional modifications.

Step 6

Once approved by the Fire Code Advisory and Appeals Board, it is submitted to the City Attorney for review.

Step 7

It is presented to “You”

THE PUBLIC SAFETY COMMITTEE

Step 8

The proposed new 2006 Dallas Fire Code is submitted to the Dallas City Council for approval. If approved, it is “ADOPTED.”
