

FIRE PROTECTION COORDINATION CERTIFICATE

Fire hydrant placement for subdivisions and new development is an integral part of the design for water and wastewater systems and services. It is important and required that the Consulting Engineer coordinate his/her water design plans with Building Inspection (BI) or in some cases with the Dallas Fire (DFD) Department.

Fire protection coordination and review shall be accomplished prior to the second review submittal of plans to Dallas Development Services, Water Engineering Section. Contact **Building Inspection (BI), 320 E. Jefferson, Room 105, Dallas, Texas 75203, 214-948-4480**. In certain cases, Building Inspection may refer you to the Dallas Fire Department for the coordination. Architectural site plans, Certificate and Checklist are needed when approaching Building Inspection or the Fire Department.

THIS IS TO CERTIFY THAT I HAVE COORDINATED FIRE PROTECTION REQUIREMENTS WITH BUILDING INSPECTION/FIRE DEPARTMENT
